

# Application Integration

Sage 100

## A Leader in Application Integration for Sage 100

A single source for all your Sage 100 integrations. Connect The Dots with TEKOA and seamlessly integrate Sage 100 with other applications used to run your business. Schedule integration events or launch on demand, easily managed bridges between the tools that run your business and Sage 100.

Integrate files, applications, web sites and more with your Sage 100 software to automate workflows and increase data accuracy.

TEKOA has a team of Application Integration professionals that help you **Connect The Dots** of your Sage 100 Integration project.

### Essential Automated File Import

Paste files to a secured public or private folder and have the file contents automatically inserted into Sage 100. Everything from Sage 100 Journal Entries to Orders and Invoices. Supported files include CSV, XML or JSON. Ideal for the automated import of Customer Purchase Orders into Sage 100 Sales Order Entry. Increase sales, ease the burden of manual data entry and increase data accuracy when you simply drop files into a folder and have them automatically inserted into Sage 100.

### Essential Automated File Export

When new data appears in Sage 100, automatically export files containing necessary Sage 100 data. Have the files deposited to a secured public or private folder, or email delivered to a designated recipient. A great solution for Advanced Ship Notices, automated spreadsheet reports or any data you want to pull from Sage 100 and export it into a file automatically.

### TEKOA Data Manager

Using Microsoft SQL automatically cache Sage 100 data into SQL where you can build queries and procedures that produce the data sets you need for detailed business analysis and SQL Reporting Services. Take reporting and KPI dashboards to the next level with advanced data management tools and TEKOA Data Manager.

## TEKOA Electronic Data Interchange (EDI)

A full featured EDI Solution for Sage 100. Send and Receive EDI transactions between Sage 100 and your Trading Partners. Including common EDI transactions like: 850, 856, 810 and more. Build your own document maps and initiate secured Endpoints. Monitor transactions using TEKOA's intuitive web interface and meet all the requirements of Trading Partners to successfully exchange EDI documents. Build stronger relationships with key Customers and Suppliers by integrating Sage 100 using TEKOA EDI.

### TEKOA REST API for Sage 100

TEKOA built from the ground up a unique developer tool for programmers that want to dialogue with Sage 100 using REST API technology. Seamlessly integrate web sites, web portals, ecommerce and applications in real-time using common GET, POST & PUT REST API commands connected to Sage 100. Complete Endpoint documentation provided and professional integration support enables you to develop custom integrations for Sage 100.

### Additional Features

- Automatic Transaction Logging & Archive
- Professional Integration Support Services
- Customizable for unique needs
- Available options for data transformation between endpoints
- Custom file Retrieving or Sending Configurations
- Automated Email Notifications of Integration Events
- Monthly or Annual Subscriptions Available
